

Positive half-yearly figures for EcoIntense

New customer growth exceeds the software provider's previous year figures

Berlin, August 3, 2016 – The software provider EcoIntense continues on its growth track in the first six months of 2016. The number of incoming orders from new customers was four times that of the same period in the preceding year. New customer accrual within this half-year surpassed the number in the entire year 2015. This positive trend can be mainly accounted to the keen gain of over 50 new customers in the mechanical engineering, automotive, and chemical industries.

EcoWebDesk, the software for health, safety and environmental management (HSE) as well as sustainability management, is now in use at KAPP Werkzeugmaschinen GmbH and TRUMPF GmbH + Co. KG. Further, Continental Automotive GmbH, Continental Reifen Deutschland GmbH and the chemical company DörkenGroup also use the web-based software to manage their occupational health and safety measures and environmental protection. 'More and more companies in the most varied sectors are deciding to use EcoWebDesk. This shows that the software has established itself as a proven standard for all HSE related tasks', says Markus Becker, CEO of EcoIntense.

EcoWebDesk is a comprehensive and integrated off-the-shelf software solution for occupational health, safety and environmental (HSE) management as well as sustainability management. In EcoWebDesk, key indicators and business goals can be aligned with operational requirements, environmental protection regulations, legal norms as well as workplace safety requirements and risk management. The software is suitable for management systems according to ISO 14001, ISO 50001 and OHSAS 18001 as confirmed by DEKRA Assurance Services. EcoIntense GmbH is certified according to DIN EN ISO 9001. The company is headquartered in Berlin, Germany. Further offices are located in Lower Saxony and Bavaria (Germany), Linz (Austria) and Houston, Texas (USA).
